Odin Technology Ltd. Announces Axe for Microsoft Visual Studio 2010

Axe, an industry leading platform for test automation, increases productivity and reduces maintenance overheads for software test automation projects. Axe uses Microsoft Excel spreadsheets as a means to model test scenarios and code generation techniques to generate self-documented automation code for Visual Studio 2010.

Reading, United Kingdom — Today, April 12, 2010, as developers from around the world gather at the world famous Bellagio Hotel for the Microsoft Visual Studio 2010 Conference and Expo, Odin Technology Ltd. announces the simultaneous-shipment of the Axe Test Automation Platform. The Axe platform takes a “holistic” approach to test automation combining the best practices of both testing and software engineering to produce cohesive and appropriate automated test scripts.

“The cutting edge technology of the Axe platform, allows generalist testers to define and maintain automated UI tests in natural language Microsoft Excel tables. Axe uses code generation to create coded UI scripts and corresponding documentation, enabling generalist testers to utilize the automated testing capabilities of Microsoft Visual Studio 2010” said Sam Warwick, Director and Founder of Odin Technology Ltd.

“Microsoft is pleased that Odin, a Visual Studio Industry Partner, has invested early in supporting Visual Studio 2010 and our next-generation application development platform, and is today simultaneously shipping Axe for Visual Studio 2010,” said Matt Carter, director of Visual Studio product management at Microsoft Corp. **“Products like Axe for Visual Studio 2010 help customers simplify their development process from design to deployment when using Microsoft products like Visual Studio 2010 and Microsoft .NET Framework 4.”**

About Odin Technology Ltd.

Odin Technology designs, develops and implements automated software testing products and solutions throughout the world. Axe automation software is easy to use, speeds up test processes, ensures products are released on time and optimizes your return on investment. The company's leading edge test automation platform empowers clients with the ability to build better software through the use of successful test automation. Visit us on the web at www.axetest.com
